

# Alarm.com NEW Features

Alarm.com recently introduced several new end-user features to its Interactive service plans, at NO additional charge.

## Arming Reminders

Never forget to arm your security system again!

Receive an email or text message reminder if your system hasn't been armed by a specific time. Example: Receive a text message if the system is not armed on weekdays by 9:00 am, when you've already left for work.

Included on all Alarm.com Basic and Advanced Interactive residential service plans.

Website Permissions For Login: **bobbsmithjr**      Permissions Template: **Full**

Tab	Sub-Tab	Permission
<b>Security</b>	System Status	<input checked="" type="checkbox"/> Remote Arming
	Sensors	<input checked="" type="checkbox"/> View Page
		<input checked="" type="checkbox"/> Change Sensor Descriptions
	Arming Reminders	<input checked="" type="checkbox"/> View Page <input type="checkbox"/> Change Settings
<b>History</b>	All Sub-Tabs	<input checked="" type="checkbox"/> View Page
<b>Notifications</b>	Alarms	<input checked="" type="checkbox"/> View Page <input type="checkbox"/> Change Settings
	System Events	<input checked="" type="checkbox"/> View Page
		<input type="checkbox"/> Change Settings
	Normal Activity	<input checked="" type="checkbox"/> View Page <input type="checkbox"/> Change Settings

## Multiple User Logins

Share your Alarm.com account, not your login.

Give anyone their own web login to access your Alarm.com security system online. User-based permission settings let you specify exactly what a given user can view and edit on each page in your account.

Included on all Alarm.com Basic and Advanced Interactive service plans.

## Sensor-Left-Open Notifications

Don't forget to shut the door on your way out!

Receive an email or text message alert when a door, cabinet, or window sensor is left open for too long during a specific time frame.

Example: Receive an alert if the Inventory Closet Door is left open for more than 15 minutes between 9:00am and 5:00pm on weekdays.

Supported on Alarm.com firmware versions 117 or higher.  
Included on all Alarm.com Advanced Interactive service plans.
